RUN PERIOD:	3 months

Background:

North Shore Hospice is the provider of specialist community palliative care services within the Waitemata DHB patient catchment area. The hospice has a 9 bed inpatient unit and provides the base for the community palliative care nursing service. The hospice receives approximately 600 referrals to its service each year and at any one time there are some 150 patients receiving community care.

Patients eligible for specialist palliative care include those with active, progressive advanced disease for whom the prognosis is limited and whose focus of care is quality of life *and* who have a level of need that exceeds the resources of the primary health care team. Eligibility is based on need not diagnosis, and patients with either malignant or non-malignant diseases may be referred for palliative care.

The multidisciplinary team works together to ensure that patients receive comprehensive care appropriate to their needs. These needs may include elements within physical (tinana), psychological (hinengaro), social (whānau) or spiritual (wairua) domains.

The hospice service has close links with North Shore Hospital Specialist Palliative Care Team as well as other community services (hospices, cancer society, district nursing services, private hospitals) providing palliative care. Liaison with these services and the patient's general practitioner (GP) are routine
